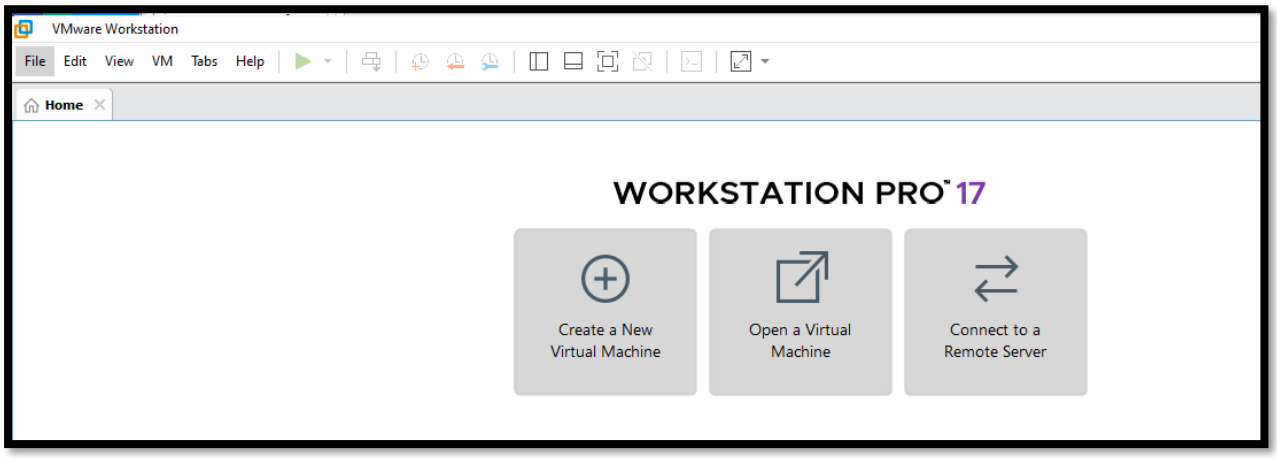
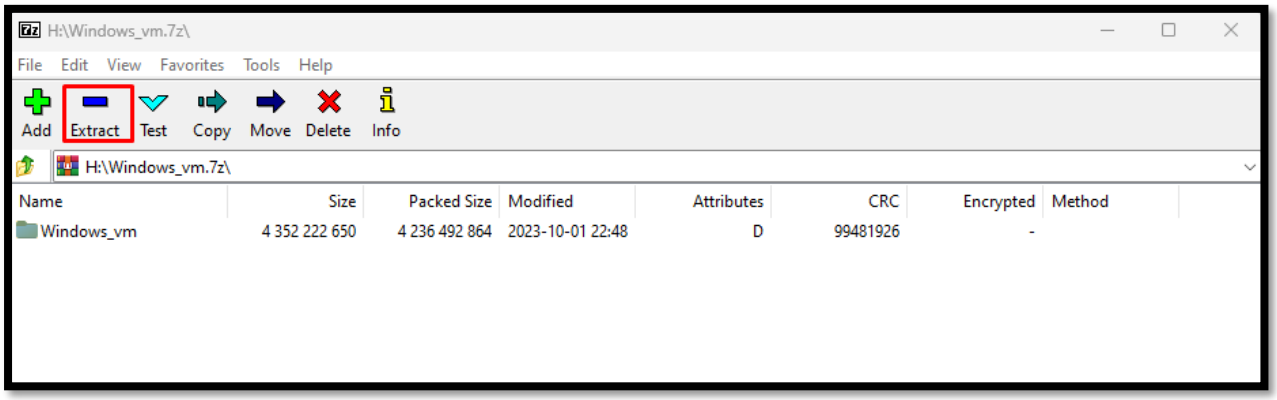
Guide to import VM in VMware workstation

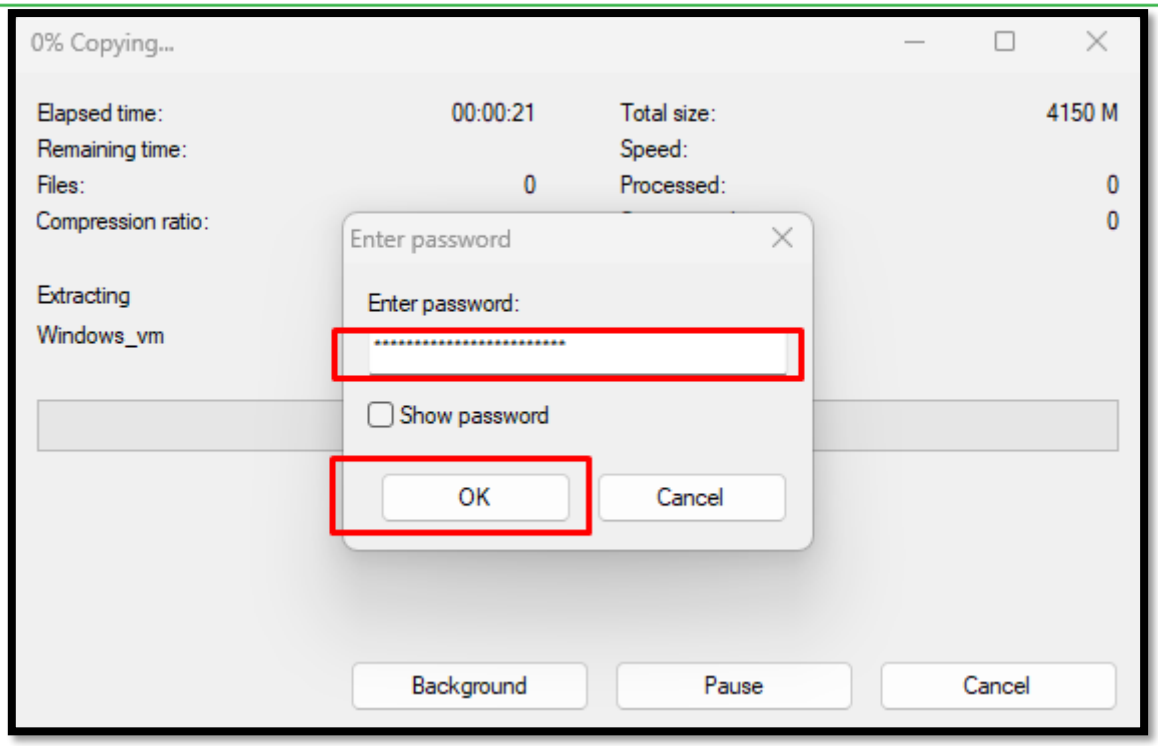
Step1. Install VMware workstation 17.0



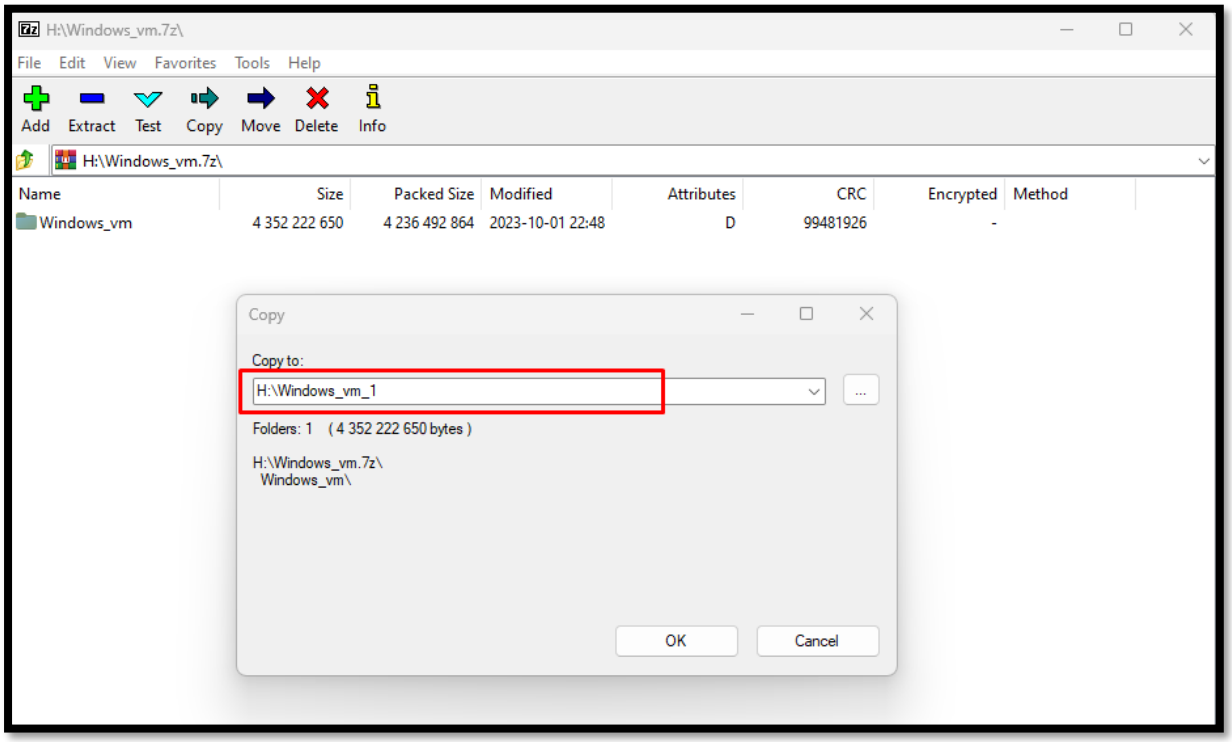
Step2. Download the vm from link

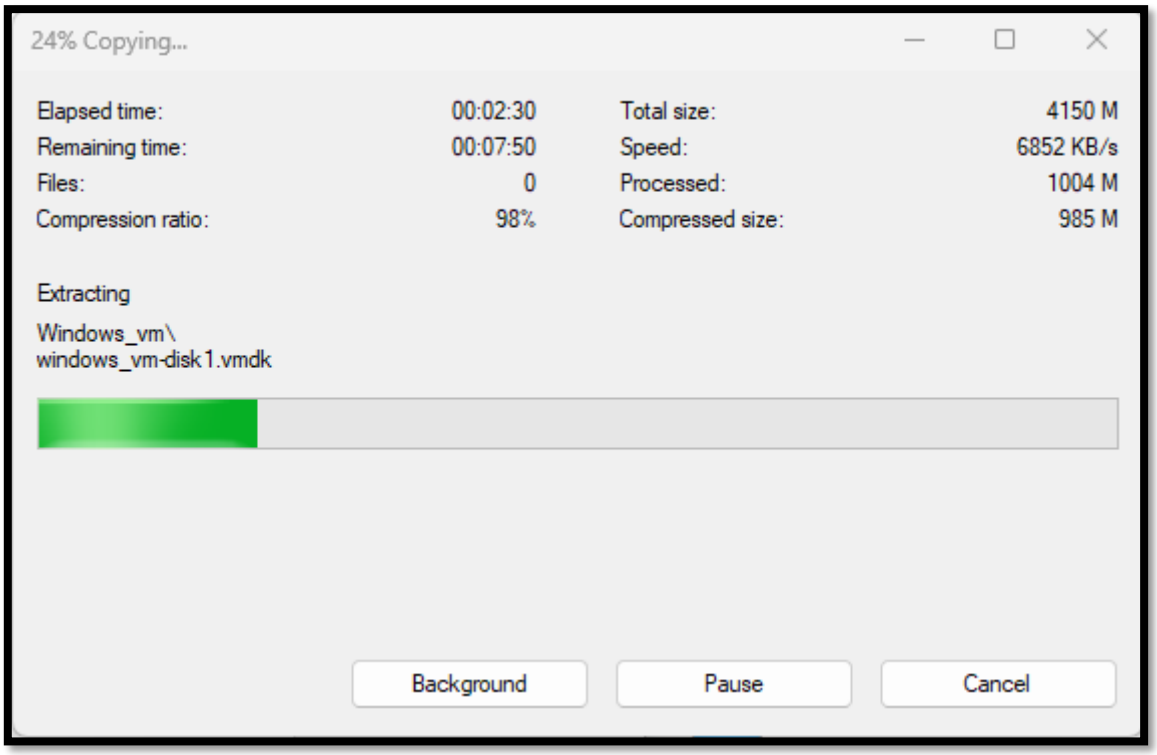
Step3. Uzip the folder with 7z



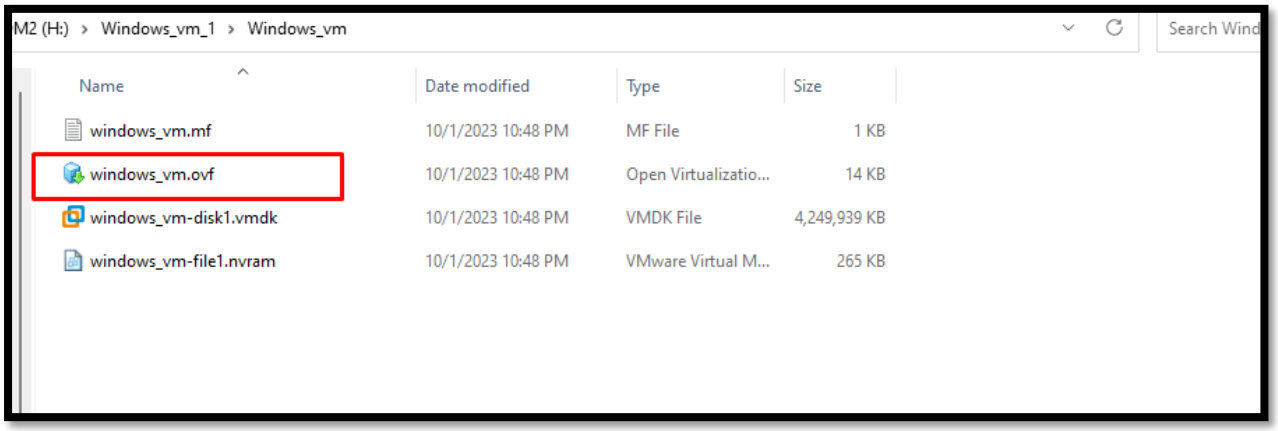


Click ok to extract. Provide password when prompted.



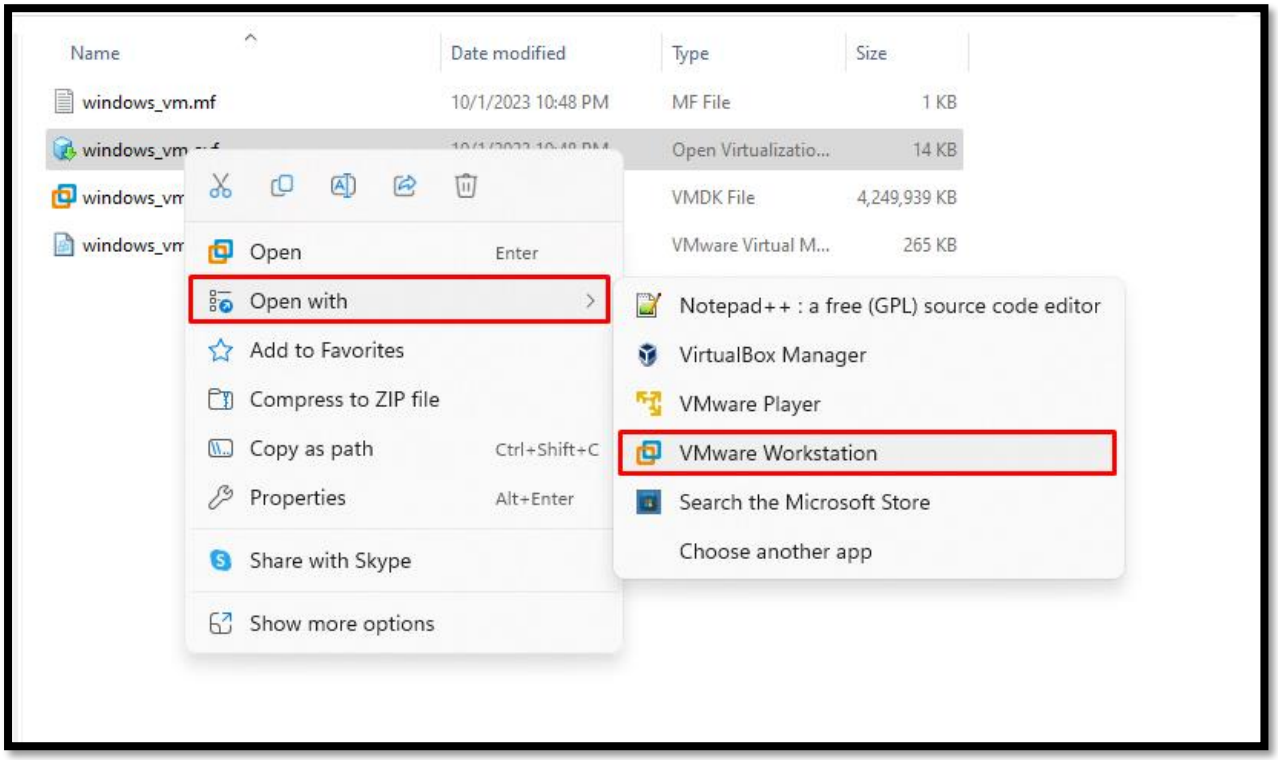


This shows the extract progress. After the extraction completed, go to the extract folder.

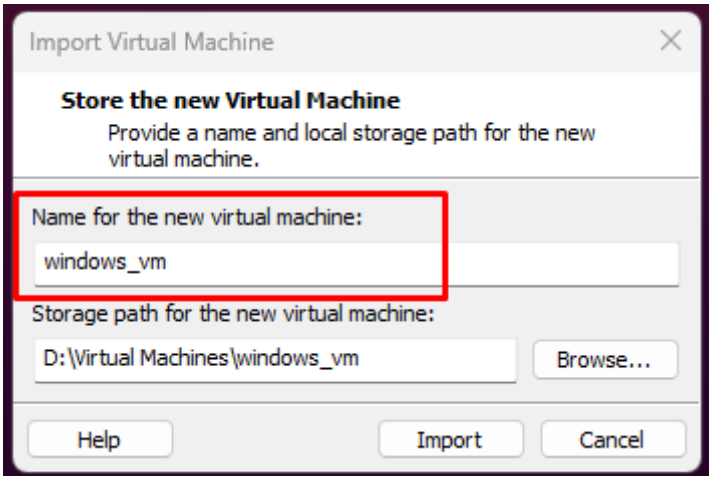


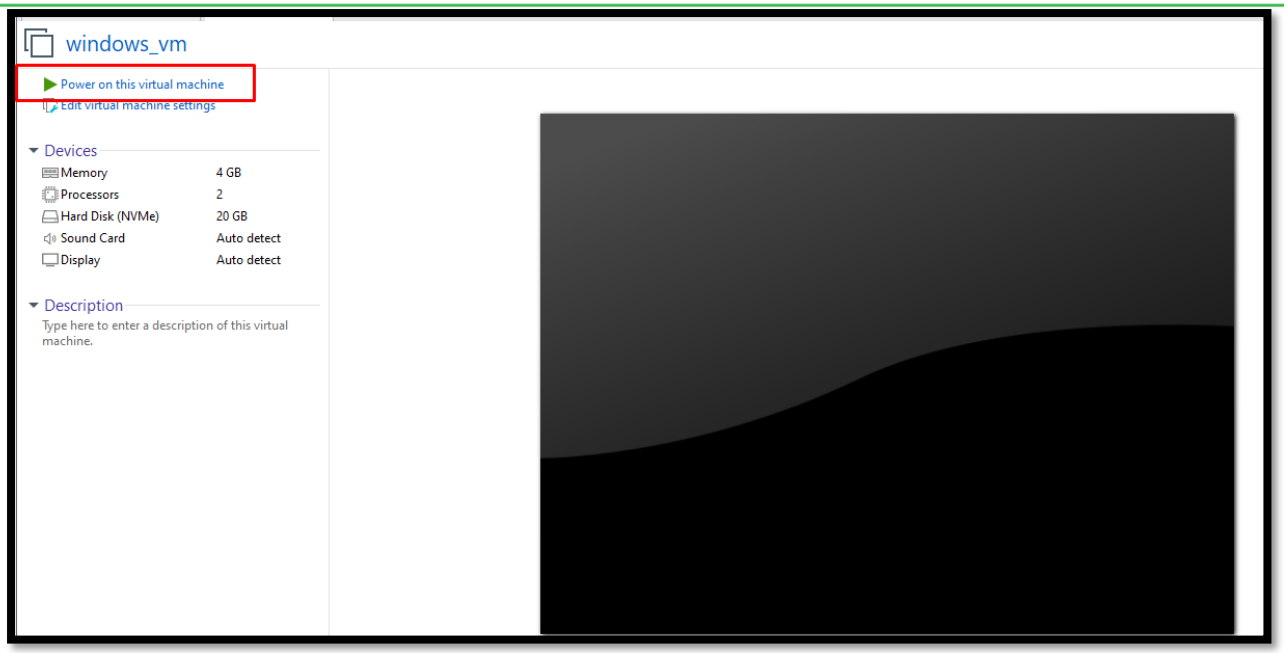
This will take few minutes to import the new VM.

Double click the **windows_vm.ovf or** open the file with vmware workstation.

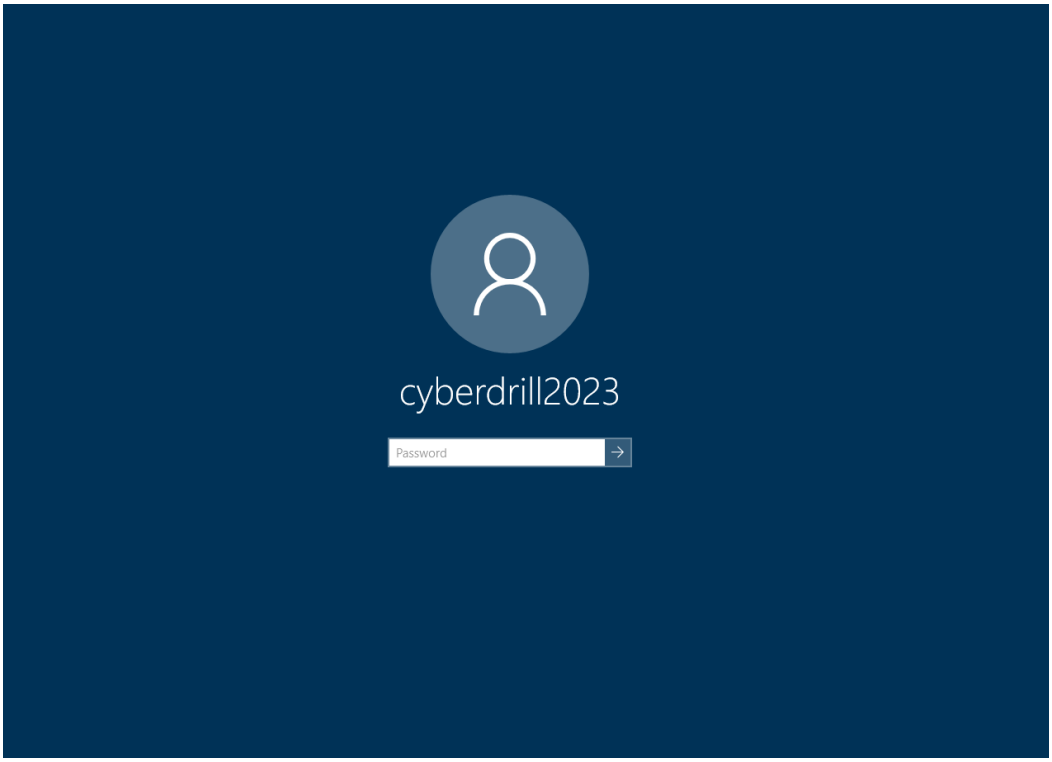


Provide name for the VM and click import.





Provide the password to unlock the VM



Then Go around the VM for flag.
