TREC Affairs Department

Ref: DSE/COM/TAD/Dev_in_house-Software/2022/2512.
Date: October 2, 2022

From: TREC Affairs Department

To: ICT Division

OFFICE NOTE

Subject: Upgradation of "DSE In-house Information Software".

TREC Affairs Department and ICT Division use a software namely "DSE In-house Information Software" developed by ICT Division a long time ago. Information of different offices of TREC holder companies including main office, extension of main office, branch office, information of authorized representative, allocation of TWS, network related information, information of stock-dealer, stock-broker, AR registration certificate etc are preserved in the software. This information is used in the day to day operation of TREC Affairs Department and the database has also been updated. In addition, TREC Affairs Department is also using another software to give reminder to the TREC Holder Companies about the renewal of stock-dealer, stock-broker, AR registration certificates.

In the course of time the number of TRECs and activities have increased and it is also required to add some new features, information fields, services by enhancing the existing capacity or upgrading the software. The requirement was discussed with ICT Division and it was agreed that the capacity enhancement would not be convenient in the existing software due to limitation in its architecture, rather the same could be upgraded in another platform.

We may upgrade the software phase by phase. In the 1st phase, we need to make the existing database more informative. Primary requirements are:

1. Information of existing two software needs to be migrated in a single software.
2. Mapping of information of TWS with user and location.
3. Incorporation of information of digital booth.
4. Incorporation of information regarding directors, shareholders, RJSC documents of TREC holder companies and their changes thereof.
5. Addition of more information about TREC holder companies.
6. Updating the database of AR with phone number, address, NID, Spouse name etc.
7. Synchronization of the software with DSE website to show different information of TREC holder companies. and
8. Information of CAMLCO.

For the migration works, the involvement of ICT officials who were involved in developing the existing software will be required.

In the 2nd phase, we would develop and activate online application process to provide various services to TREC Holder companies which does not require approval from BSEC. Primary considerations might be given to:

1. Allocation of TWS.
2. Shifting of TWS.
3. Suspension of TWS.
4. Withdrawal of Authorized Representatives.

Dhaka Stock Exchange Ltd.
TREC Affairs Department

In the 3rd phase, we may incorporate other activities, like approval of office, relocation, addition of space, closure of office, appointment of AR, renewal of TREC, Stock-Broker and Stock-Dealer Registration certificate, name change etc.

The whole tasks need to be completed by ICT Division upon taking feedback from TREC Affairs Department from time to time. A team comprising of officials of concerned department of ICT and TAD should be formed to expediate and complete the tasks. 03/10/22

The matter is placed for approval.
